APPENDIX I

SAN DIEGO-LA JOLLA UNDERWATER PARK AND ECOLOGICAL PRESERVE

The San Diego-La Jolla Underwater Park is a dedicated City park consisting of 5,977 acres of tidal and submerged lands between La Jolla Cove and the northern boundary of the City of San Diego. The park was established by the City Council in 1970 to protect and conserve all aspects of the marine environment including marine plants and animals, geological formations, archaeological artifacts and scenic resources. Additionally, a seven-member Advisory Committee was created to offer advice relative to the maintenance and development of the park.

In 1971, the City Council, acting on the recommendation of the Advisory Committee, established a 514-acre ecological preserve within the dedicated limits of the underwater park. The reserve was formally designated a "Look-Don't Touch" area. Responsibilities for maintenance of the park are set forth in a license agreement between the City of San Diego and the California Department of Fish and Game. Under the terms of the agreement, the City is responsible for maintenance of the buoys and shore markers which set the boundaries of the reserve, the Department of Fish and Game enforces the rules and regulations governing the use of the park.

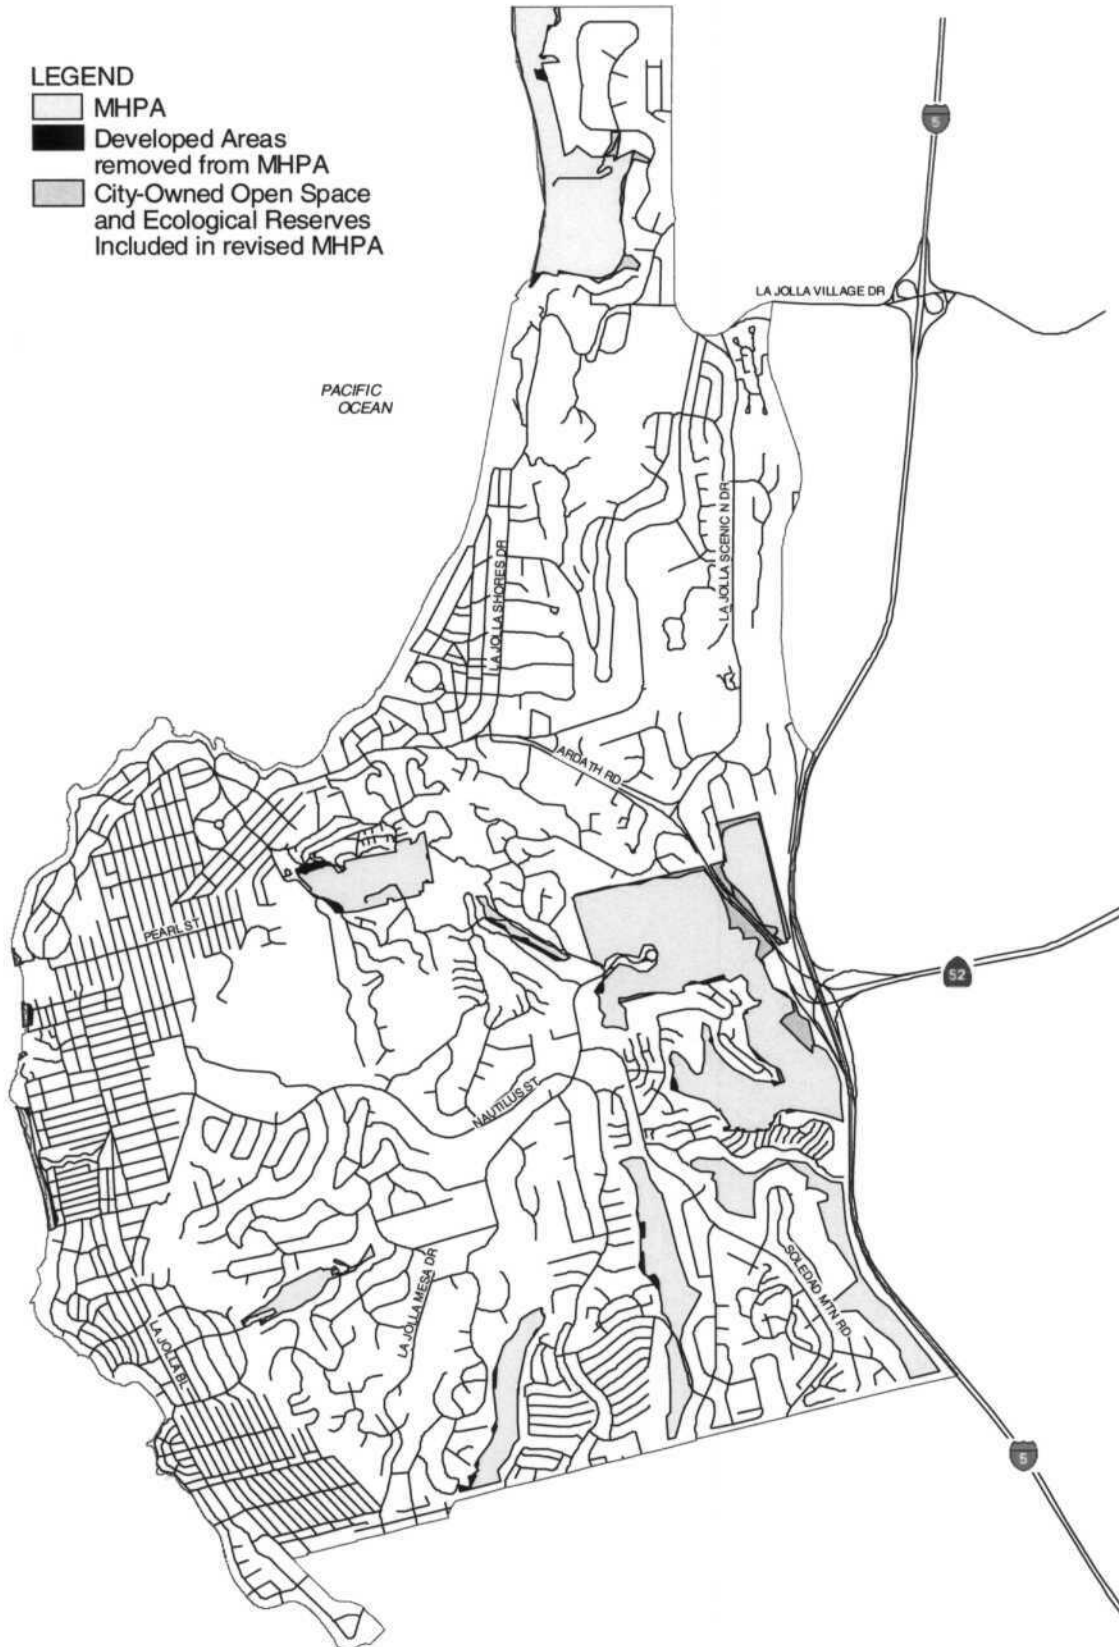

The San Diego-La Jolla Ecological Reserve is to be preserved in a natural condition for the benefit of the general public to observe native flora and fauna and subject to the following regulations:

- No person should disturb or take any plant, bird, mammal, fish, mollusk, crustacean reptile or any other form of plant life, marine life, geological formation or archaeological artifacts except by permit from the Fish and Game Commission.
- Commercial or sport fishing is prohibited in the reserve except by permit from the Fish and Game Commission.
- Swimming, boating and other aquatic sports are permitted in the reserve. Boats may be launched or retrieved only at designated areas, however, and may be anchored within the reserve only during daylight hours.
- Public entry into the reserve may be restricted at the discretion of the Department of Fish and Game in order to protect the marine life or habitat of the area.
- The use, firing or discharging of any weapon by any person, excluding authorized personnel, within or into the reserve is prohibited.
